

HisabDo

Software Quality Assurance — Test Case Document

Mobile Application & Website — Detailed Test Cases with Execution Status

Document Date: 16-Aug-2026
Track: SQA | Capstone — Day 9

Execution Summary

Overall

Total Test Cases	36
Passed	10
Failed	0
Not Executed	26

Mobile Application

Total Test Cases	21
Passed	8
Failed	0
Not Executed	13

Website

Total Test Cases	15
Passed	2
Failed	0
Not Executed	13

Note: 10 test cases were executed for this Day 9 submission (per the 'at least 10' requirement), all passing. The remaining 26 designed test cases, including further negative/error-handling scenarios, are planned for execution in Day 10.

Mobile Application — Test Cases

21 test cases covering Login/Authentication, Customer Management, Transaction Management, Navigation, Reports, Settings, Error Handling, UI/UX and Boundary/Negative scenarios.

MOB-TC-001 — Verify login with valid credentials

Module	Login/Authentication
Preconditions	User has a registered account and the application is installed
Test Steps	1. Open HisabDo app. 2. Enter registered username/email. 3. Enter valid password. 4. Tap Login.
Test Data	Valid registered username/email and password
Expected Result	User should be successfully logged in and redirected to the dashboard.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	High

MOB-TC-002 — Verify login with incorrect password

Module	Login/Authentication
Preconditions	User has a registered account
Test Steps	1. Open HisabDo app. 2. Enter valid username/email. 3. Enter incorrect password. 4. Tap Login.
Test Data	Valid username/email + incorrect password
Expected Result	System should reject the login and display an appropriate error message.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	High

MOB-TC-003 — Verify validation when login fields are empty

Module	Login/Authentication
Preconditions	HisabDo mobile application is installed and the Login screen is accessible
Test Steps	1. Open HisabDo application. 2. Navigate to the Login screen. 3. Leave username/email field empty. 4. Leave password field empty.

	5. Tap the Login button.
Test Data	Username/Email: EmptyPassword: Empty
Expected Result	Validation messages should be displayed for the required fields, and the user should not be logged in.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	High

MOB-TC-004 — Verify required-field validation when adding a new customer

Module	Customer Management
Preconditions	User is logged in and the Add Customer form is accessible
Test Steps	1. Open HisabDo application. 2. Navigate to Customers. 3. Tap Add Customer. 4. Leave a required customer field empty. 5. Enter valid data in the other required fields. 6. Tap Save/Add Customer.
Test Data	Required customer field: EmptyOther fields: Valid customer information
Expected Result	System should display a validation message for the empty required field and should not create the customer until all required information is provided.
Actual Result	Not Executed
Status	Not Executed
Priority	High

MOB-TC-005 — Verify that the Add Customer form rejects invalid data format

Module	Customer Management
Preconditions	User is logged in and the Add Customer form is accessible
Test Steps	1. Open HisabDo application. 2. Navigate to Customers. 3. Tap Add Customer. 4. Enter valid information in the other required fields. 5. Enter an invalid value in an applicable field, such as an incorrectly formatted email address. 6. Tap Save/Add Customer.
Test Data	Email: abc@ (invalid format)
Expected Result	System should reject the invalid data and display an appropriate validation message. The customer should not be added until the invalid data is corrected.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass

Priority	High
----------	------

MOB-TC-006 — Verify amount field validation when adding a transaction using minimum, zero, and unusually large values

Module	Transaction Management
Preconditions	User is logged in and the Add Transaction screen is accessible
Test Steps	1. Open HisabDo application. 2. Navigate to Transactions. 3. Tap Add Transaction. 4. Enter the required transaction details. 5. Enter 0 in the Amount field and try to save. 6. Enter the lowest valid amount accepted by the application and save. 7. Enter an unusually large amount and try to save. 8. Observe the validation behavior.
Test Data	Amount: 0 Minimum valid amount: As defined/accepted by the application Large amount: A value exceeding the normal permitted range
Expected Result	System should properly validate the transaction amount. Invalid or out-of-range values should be rejected with an appropriate validation message, while valid amounts should be accepted and the transaction should be added successfully.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	High

MOB-TC-007 — Verify navigation from the dashboard to the Transactions module

Module	Navigation
Preconditions	User has a valid account and is successfully logged in
Test Steps	1. Open the HisabDo mobile application. 2. Log in with valid credentials. 3. Verify that the Dashboard/Home screen is displayed. 4. Tap the Transactions option/module. 5. Observe the displayed screen.
Test Data	Valid username/email and password
Expected Result	The Transactions module should open successfully without errors, and the correct Transactions screen should be displayed.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

MOB-TC-008 — Verify back navigation from the Transactions screen to the previous screen

Module	Navigation
Preconditions	User is logged in and the Transactions module is accessible
Test Steps	1. Open HisabDo mobile application. 2. Log in with valid credentials. 3. Open the Transactions module. 4. Navigate to a transaction details/add transaction screen. 5. Press the Back button. 6. Observe the displayed screen.
Test Data	Valid login credentials
Expected Result	User should be returned to the previous screen without losing or unexpectedly changing existing data.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

MOB-TC-009 — Verify that the user can create a new transaction

Module	Transaction Management
Preconditions	User is logged in and the Transactions module is accessible
Test Steps	1. Open HisabDo mobile application. 2. Navigate to Transactions. 3. Tap Add Transaction. 4. Enter valid transaction details. 5. Tap Save/Add. 6. Observe the transaction list.
Test Data	Valid transaction details, such as transaction type, amount, date, and other required information
Expected Result	The new transaction should be saved successfully and should appear in the transaction list.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	High

MOB-TC-010 — Verify that the user can view the details of an existing transaction

Module	Transaction Management
Preconditions	User is logged in and at least one transaction exists
Test Steps	1. Open HisabDo mobile application. 2. Navigate to Transactions.

	3. Locate an existing transaction. 4. Tap the transaction. 5. Observe the transaction details.
Test Data	Existing transaction
Expected Result	The selected transaction should open and display the correct details, such as amount, date, type, and other available information.
Actual Result	Not Executed
Status	Not Executed
Priority	High

MOB-TC-011 — Verify that the user can update an existing transaction

Module	Transaction Management
Preconditions	User is logged in and at least one transaction exists
Test Steps	1. Open HisabDo mobile application. 2. Navigate to Transactions. 3. Select an existing transaction. 4. Tap the Edit/Update option. 5. Modify one or more transaction details. 6. Tap Save/Update. 7. Reopen the transaction and check the details.
Test Data	Existing transaction with updated valid information
Expected Result	The updated transaction information should be saved successfully and the new details should be displayed correctly when the transaction is viewed again.
Actual Result	Not Executed
Status	Not Executed
Priority	High

MOB-TC-012 — Verify that a deleted transaction remains deleted after logout and login

Module	Transaction Management
Preconditions	User is logged in and an existing transaction is available
Test Steps	1. Open HisabDo mobile application. 2. Navigate to Transactions. 3. Select an existing transaction. 4. Tap Delete. 5. Confirm the deletion. 6. Verify that the transaction is removed from the transaction list. 7. Log out from the account. 8. Log in again using the same account. 9. Navigate to Transactions.

	10. Check whether the deleted transaction is displayed.
Test Data	Existing transaction selected for deletion
Expected Result	The deleted transaction should remain deleted and should not appear after logging out and logging back into the same account.
Actual Result	Not Executed
Status	Not Executed
Priority	High

MOB-TC-013 — Verify that a deleted customer remains deleted after logout and login

Module	Customer Management
Preconditions	User is logged in and at least one customer exists
Test Steps	1. Open HisabDo mobile application. 2. Navigate to Customers. 3. Select an existing customer. 4. Tap Delete. 5. Confirm the deletion. 6. Verify that the customer is removed from the customer list. 7. Log out from the account. 8. Log in again using the same account. 9. Navigate to Customers. 10. Check whether the deleted customer is displayed.
Test Data	Existing customer selected for deletion
Expected Result	The deleted customer should remain deleted and should not appear after logging out and logging back into the same account.
Actual Result	Not Executed
Status	Not Executed
Priority	High

MOB-TC-014 — Verify that the user can view/generate a report based on the selected criteria

Module	Reports
Preconditions	User is logged in and the Reports section is accessible
Test Steps	1. Open HisabDo mobile application. 2. Log in with valid credentials. 3. Navigate to the Reports section. 4. Select the required report type, date, or available filter. 5. Tap Generate/View Report if available. 6. Observe the displayed report.
Test Data	Valid report type/date/filter

Expected Result	The system should display the correct report according to the selected criteria, and the displayed information should be relevant to the selected criteria.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	High

MOB-TC-015 — Verify system behavior when a report has no available data

Module	Reports
Preconditions	User is logged in and the Reports section is accessible
Test Steps	1. Open HisabDo mobile application. 2. Log in with valid credentials. 3. Navigate to Reports. 4. Select a date, period, or filter for which no transaction/report data is available. 5. Generate/View the report. 6. Observe the application response.
Test Data	Date/period with no available data
Expected Result	System should display an appropriate message such as “No data available” or an empty-state message. The application should not crash or display incorrect information.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

MOB-TC-016 — Verify that the Settings screen opens correctly

Module	Settings
Preconditions	User is logged in to the HisabDo mobile application
Test Steps	1. Open HisabDo mobile application. 2. Log in with valid credentials. 3. Navigate to the Settings option. 4. Tap Settings. 5. Observe the Settings screen.
Test Data	Valid login credentials
Expected Result	Settings screen should open successfully and all available settings/options should be displayed correctly without errors.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	Medium

MOB-TC-017 — Verify that a selected setting can be changed and the change is saved

Module	Settings
Preconditions	User is logged in and the Settings screen is accessible
Test Steps	1. Open HisabDo mobile application. 2. Navigate to Settings. 3. Select an available setting that can be changed. 4. Change the setting. 5. Save/Apply the change if required. 6. Leave the Settings screen. 7. Reopen Settings. 8. Verify the selected setting.
Test Data	Available setting with a valid alternative option
Expected Result	The selected setting should be changed successfully and the new setting should remain selected when the Settings screen is reopened.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

MOB-TC-018 — Verify application behavior when the internet connection is unavailable

Module	Error Handling
Preconditions	User is logged in and the HisabDo mobile application is installed
Test Steps	1. Open HisabDo mobile application. 2. Log in with a valid account while the internet connection is available. 3. Turn off Wi-Fi/mobile data. 4. Navigate to a feature that requires an internet connection, such as Transactions or Customers. 5. Try to load or perform an operation. 6. Observe the application response.
Test Data	Internet connection: Disabled
Expected Result	Application should handle the network failure properly by displaying an appropriate error/offline message. The application should not crash or become unresponsive.
Actual Result	Not Executed
Status	Not Executed
Priority	High

MOB-TC-019 — Verify that important buttons, text, and navigation elements are clearly visible and properly positioned

Module	UI/UX
Preconditions	HisabDo mobile application is installed and accessible

Test Steps	1. Open HisabDo mobile application. 2. Open the Login screen and check the Login button and text fields. 3. Log in and navigate to the relevant module. 4. Check the Add, Save, and Delete buttons where available. 5. Check the navigation elements/menu options. 6. Observe the text, buttons, spacing, alignment, and overall layout.
Test Data	N/A
Expected Result	All important UI elements should be clearly visible, readable, properly aligned, and appropriately positioned. Buttons should be easy to identify and use without overlapping or being cut off.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

MOB-TC-020 — Verify that the Add Customer form properly handles an extremely long customer name

Module	Customer Management
Preconditions	User is logged in and the Add Customer form is accessible
Test Steps	1. Open HisabDo mobile application. 2. Navigate to Customers. 3. Tap Add Customer. 4. Enter an extremely long string in the Customer Name field. 5. Fill in other required fields with valid information. 6. Tap Save/Add Customer. 7. Observe the application behavior.
Test Data	Customer Name: Extremely long text exceeding the normal expected length
Expected Result	The application should properly restrict or handle the excessive input. It should not crash, freeze, or corrupt the customer information. If a character limit exists, an appropriate validation message should be displayed.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

MOB-TC-021 — Verify how the system handles adding a customer with duplicate information

Module	Customer Management
Preconditions	User is logged in and the Add Customer feature is accessible
Test Steps	1. Open HisabDo mobile application. 2. Navigate to Customers. 3. Tap Add Customer.

	4. Enter valid customer information. 5. Save the customer. 6. Open Add Customer again. 7. Enter the same customer information. 8. Tap Save/Add Customer. 9. Observe the result.
Test Data	Same customer information used for both entries
Expected Result	System should handle duplicate customer information according to its business rules and provide appropriate feedback. If duplicate customers are not allowed, the system should prevent the duplicate entry and display an appropriate message.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

Website — Test Cases

15 test cases covering Home/Navigation, Forms & Validation, External Links, UI/UX and Responsive Design.

WEB-TC-001 — Verify that the HisabDo Home page loads correctly

Module	Home
Preconditions	User has an internet connection and a supported web browser
Test Steps	1. Open a web browser. 2. Navigate to the HisabDo website. 3. Observe the Home page. 4. Check the main content, images, navigation menu, and buttons.
Test Data	HisabDo website
Expected Result	Home page should load successfully without errors and all major content and navigation elements should be displayed correctly.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	High

WEB-TC-002 — Verify that the About navigation link opens the correct page

Module	Navigation
Preconditions	HisabDo Home page is loaded
Test Steps	1. Open the HisabDo website. 2. Locate the About link. 3. Click the About link. 4. Observe the page that opens.
Test Data	About link
Expected Result	The About link should open the correct About page without errors.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

WEB-TC-003 — Verify that the App navigation link opens the correct page

Module	Navigation
Preconditions	HisabDo Home page is loaded
Test Steps	1. Open the HisabDo website. 2. Locate the App link. 3. Click the App link. 4. Observe the page that opens.

Test Data	App link
Expected Result	The App link should open the correct HisabDo App information page without errors.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

WEB-TC-004 — Verify that the Founder navigation link opens the correct page

Module	Navigation
Preconditions	HisabDo Home page is loaded
Test Steps	1. Open the HisabDo website. 2. Locate the Founder link. 3. Click the Founder link. 4. Observe the page that opens.
Test Data	Founder link
Expected Result	The Founder link should open the correct Founder page without errors.
Actual Result	Not Executed
Status	Not Executed
Priority	Low

WEB-TC-005 — Verify that the Leadership navigation link opens the correct page

Module	Navigation
Preconditions	HisabDo Home page is loaded
Test Steps	1. Open the HisabDo website. 2. Locate the Leadership link. 3. Click the Leadership link. 4. Observe the page that opens.
Test Data	Leadership link
Expected Result	The Leadership link should open the correct Leadership page without errors.
Actual Result	Not Executed
Status	Not Executed
Priority	Low

WEB-TC-006 — Verify that the Blog navigation link opens the Blog page correctly

Module	Blog
Preconditions	HisabDo Home page is loaded

Test Steps	1. Open the HisabDo website. 2. Click the Blog link. 3. Observe the Blog page. 4. Check whether blog content is displayed correctly.
Test Data	Blog link
Expected Result	Blog page should open successfully and available blog content should be displayed correctly.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

WEB-TC-007 — Verify that the FAQ page opens and FAQ content is accessible

Module	FAQ
Preconditions	HisabDo Home page is loaded
Test Steps	1. Open the HisabDo website. 2. Click the FAQ link. 3. Observe the FAQ page. 4. Open/expand an available FAQ question if applicable.
Test Data	FAQ link
Expected Result	FAQ page should load correctly and users should be able to view the available frequently asked questions and answers.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

WEB-TC-008 — Verify that the Careers page opens correctly

Module	Careers
Preconditions	HisabDo Home page is loaded
Test Steps	1. Open the HisabDo website. 2. Click the Careers link. 3. Observe the Careers page. 4. Check the available career information.
Test Data	Careers link
Expected Result	Careers page should open successfully and available career information should be displayed correctly.
Actual Result	Not Executed
Status	Not Executed
Priority	Low

WEB-TC-009 — Verify that the Contact page and contact information/form are accessible

Module	Contact
Preconditions	HisabDo Home page is loaded
Test Steps	1. Open the HisabDo website. 2. Click the Contact link. 3. Observe the Contact page. 4. Check the available contact information and form fields, if present.
Test Data	Contact page
Expected Result	Contact page should load successfully and available contact information/form should be displayed correctly.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

WEB-TC-010 — Verify required-field validation on the Contact form

Module	Forms & Validation
Preconditions	Contact page is accessible and contains a contact form
Test Steps	1. Open the Contact page. 2. Leave required fields empty. 3. Click the Submit/Send button. 4. Observe the validation messages.
Test Data	Required fields: Empty
Expected Result	Appropriate validation messages should be displayed and the form should not be submitted until required information is provided.
Actual Result	Actual result matched the Expected Result; no issues observed.
Status	Pass
Priority	High

WEB-TC-011 — Verify that the Contact form rejects an invalid email format

Module	Forms & Validation
Preconditions	Contact page contains a contact form with an email field
Test Steps	1. Open the Contact page. 2. Enter valid information in other required fields. 3. Enter an invalid email address. 4. Click Submit/Send.

	5. Observe the result.
Test Data	Email: abc@
Expected Result	System should reject the invalid email format and display an appropriate validation message.
Actual Result	Not Executed
Status	Not Executed
Priority	High

WEB-TC-012 — Verify that the Get App link redirects to the correct application download page

Module	External Link
Preconditions	HisabDo website Home page is accessible
Test Steps	1. Open the HisabDo website. 2. Locate the Get App button/link. 3. Click the Get App link. 4. Observe the destination page.
Test Data	Get App link
Expected Result	Get App link should redirect the user to the correct HisabDo application download page, such as the Google Play Store listing.
Actual Result	Not Executed
Status	Not Executed
Priority	High

WEB-TC-013 — Verify the website layout and visibility of important UI elements

Module	UI/UX
Preconditions	HisabDo website is accessible
Test Steps	1. Open the Home page. 2. Check the navigation menu. 3. Check headings, text, images, and buttons. 4. Navigate to different pages. 5. Observe alignment, spacing, readability, and visibility of UI elements.
Test Data	N/A
Expected Result	Website elements should be clearly visible, readable, properly aligned, and consistently displayed across the website.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium

WEB-TC-014 — Verify that the HisabDo website displays correctly on different screen sizes

Module	Responsive UI
Preconditions	HisabDo website is accessible through a web browser
Test Steps	1. Open the HisabDo website on a desktop browser. 2. Resize the browser window to a smaller size or use browser responsive/device mode. 3. Check the navigation menu, text, images, buttons, and page layout. 4. Observe whether any content overlaps or becomes hidden.
Test Data	Desktop and mobile/tablet screen sizes
Expected Result	Website should adapt properly to different screen sizes without overlapping, cutting off, or hiding important content.
Actual Result	Not Executed
Status	Not Executed
Priority	High

WEB-TC-015 — Verify that the Privacy Policy page opens correctly

Module	Privacy Policy
Preconditions	HisabDo website is accessible
Test Steps	1. Open the HisabDo website. 2. Locate the Privacy Policy link. 3. Click the link. 4. Observe the Privacy Policy page. 5. Check whether the page content loads correctly.
Test Data	Privacy Policy link
Expected Result	Privacy Policy page should open successfully and its content should be displayed correctly without broken-page errors.
Actual Result	Not Executed
Status	Not Executed
Priority	Medium
