

API TC ID	Endpoint	Method	Test Case Title	Test Type	Request Headers	Request Body	Expected Status Code	Expected Response / Validation	Actual Result	Status	Priority
API-001	/api/users?page=2	GET	Get list of users - valid page	Positive	x-api-key: reqres-free-v1	N/A	200	Response contains 'page'=2, 'data' array of 6 users, each with id/email/first_name/last_name/avatar		Pass	High
API-002	/api/users/2	GET	Get single user by valid ID	Positive	x-api-key: reqres-free-v1	N/A	200	Response 'data' object contains id=2 with matching email and name fields		Pass	High
API-003	/api/users/23	GET	Get single user by non-existent ID	Negative	x-api-key: reqres-free-v1	N/A	404	Empty JSON object returned, no user data		Pass	High
API-004	/api/users/abc	GET	Get single user with invalid (non-numeric) ID	Negative / Boundary	x-api-key: reqres-free-v1	N/A	404	API handles gracefully, returns 404 / empty body, no server error (5xx)		Pass	Medium
API-005	/api/users	POST	Create new user with valid data	Positive	Content-Type: application/json x-api-key: reqres-free-v1	{"name": "Ahmed Raza", "job": "QA Engineer"}	201	Response returns id, createdAt timestamp, and echoes name/job submitted		Pass	High
API-006	/api/users	POST	Create user with empty request body	Negative	Content-Type: application/json x-api-key: reqres-free-v1	{}	201	API still returns 201 with id and createdAt (no server-side required-field validation) - documented behavior		Pass	Medium
API-007	/api/users	POST	Create user with malformed JSON body	Boundary / Negative	Content-Type: application/json x-api-key: reqres-free-v1	{name: Ahmed, job:} (invalid JSON)	400	API rejects malformed JSON with a 400-level error, not a 500 crash		Fail	Medium
API-008	/api/users/2	PUT	Update existing user - full update	Positive	Content-Type: application/json x-api-key: reqres-free-v1	{"name": "Ahmed Raza", "job": "Senior QA Engineer"}	200	Response echoes updated name/job and includes updatedAt timestamp		Pass	High
API-009	/api/users/2	PATCH	Partially update existing user	Positive	Content-Type: application/json x-api-key: reqres-free-v1	{"job": "QA Lead"}	200	Response echoes updated job field and includes updatedAt timestamp		Pass	Medium
API-010	/api/users/2	DELETE	Delete existing user	Positive	x-api-key: reqres-free-v1	N/A	204	No content returned; deletion acknowledged with 204 status		Pass	High
API-011	/api/register	POST	Register with valid email and password	Positive	Content-Type: application/json x-api-key: reqres-free-v1	{"email": "eve.holt@reqres.in", "password": "pistol"}	200	Response contains 'id' and 'token' fields		Pass	High
API-012	/api/register	POST	Register with missing password field	Negative	Content-Type: application/json x-api-key: reqres-free-v1	{"email": "sydney@fife"}	400	Error response: 'Missing password'		Pass	High
API-013	/api/register	POST	Register with missing email field	Negative	Content-Type: application/json x-api-key: reqres-free-v1	{"password": "pistol"}	400	Error response: 'Missing email or username'		Pass	High
API-014	/api/login	POST	Login with valid credentials	Positive	Content-Type: application/json x-api-key: reqres-free-v1	{"email": "eve.holt@reqres.in", "password": "cityslicka"}	200	Response contains a valid 'token' field		Pass	High
API-015	/api/login	POST	Login with missing password	Negative	Content-Type: application/json x-api-key: reqres-free-v1	{"email": "peter@klaven"}	400	Error response: 'Missing password'		Pass	High
API-016	/api/unknown	GET	Get list of resources	Positive	x-api-key: reqres-free-v1	N/A	200	Response 'data' array contains resource objects with id, name, year, color, pantone_value		Pass	Medium
API-017	/api/unknown/23	GET	Get single resource with non-existent ID	Negative / Boundary	x-api-key: reqres-free-v1	N/A	404	Empty JSON object returned		Pass	Medium
API-018	/api/users?page=0	GET	Get users with boundary page value (0)	Boundary	x-api-key: reqres-free-v1	N/A	200	API does not error; returns default/first page or empty data array gracefully		Pass	Low
API-019	/api/users?page=9999	GET	Get users with very large page number	Boundary	x-api-key: reqres-free-v1	N/A	200	API returns 200 with an empty 'data' array (page out of range) rather than an error		Pass	Low
API-020	/api/users	GET	Verify response time is within acceptable threshold	Non-functional / Performance	x-api-key: reqres-free-v1	N/A	200	Response time under 2000ms for a standard GET request		Pass	Medium
