

Positive & Negative Test Cases - Executed with Evidence

These test cases map directly to the screenshots captured during execution (Login, Product Browsing, Cart, Checkout on **saucedemo.com**, and API testing on **dummyjson.com**).

✔ POSITIVE TEST CASES (17)

Web - saucedemo.com

TC ID	Module	Title	Steps	Test Data	Expected Result	Actual Result	Status	Evidence
TC001	Login	Login with valid credentials	Enter valid username/password, click Login	standard_user / secret_sauce	User redirected to Products page	Redirected to Products page correctly	Pass	Screenshots/TC001_Login_Success.PNG
TC006	Inventory	Verify product list displays correctly	Log in, observe Products page	N/A	All products shown with name, description, price, image, and "Add to cart" button	4 of 6 products visible in view, all fields correct	Pass	Screenshots/TC006_Product_List.PNG
TC007	Inventory	View individual product details	Click a product name/image (e.g. Sauce Labs Bike Light)	N/A	Product Details page shows image, name, price, and Add to cart button	Displayed correctly with all elements	Pass	Screenshots/TC007_Product_Details.PNG
TC008	Inventory	Add a single product to the cart	Click "Add to cart" on one product	Sauce Labs Bike Light	Button changes to "Remove"; cart badge shows 1	Cart badge updated to "1" correctly	Pass	Screenshots/TC008_Add_To_Cart.png
TC009	Inventory	Add multiple products to the cart	Click "Add to cart" on two or more products	Bike Light + Fleece Jacket	Cart badge count increments for each item added	Cart badge updated to "2" correctly	Pass	Screenshots/TC009_Multiple_Products.PNG
TC010	Inventory	Remove a product from the cart (inventory page)	Click "Remove" on a product already in cart	Sauce Labs Backpack	Button reverts to "Add to cart"; cart badge decreases by 1	Badge correctly reduced to "1" after removal	Pass	Screenshots/TC010_Remove_Product.PNG
TC011	Cart	Verify Cart page layout and controls	Click the cart icon	N/A	Cart page shows item list (or empty state), "Continue Shopping" and "Checkout" buttons	Cart page and both buttons rendered correctly	Pass	Screenshots/TC011_Cart.PNG
TC012	Cart	Verify product info shown correctly in Cart	Add a product, open Cart page	Sauce Labs Backpack	Cart shows correct qty, name, description, and price for the item	All product details matched what was added	Pass	Screenshots/TC012_Product_information_in_cart.PNG
TC013	Cart	"Continue Shopping" returns to Products page	On Cart page, click "Continue Shopping"	N/A	User navigated back to Products page; cart contents unchanged	Returned to Products page, cart state preserved	Pass	Screenshots/TC013_Continue_Shopping.PNG
TC014	Checkout	Checkout: Your Information page loads correctly	From Cart, click "Checkout"	N/A	Form with First Name, Last Name, Zip/Postal Code fields and Cancel/Continue buttons is displayed	Form displayed correctly with all fields	Pass	Screenshots/TC014_Checkout.PNG
TC015	Checkout	Complete checkout with valid First Name, Last Name, Zip	Fill all 3 fields with valid data, click Continue	Sejal / (Last Name) / 65200	User proceeds to Checkout: Overview page	Reached Overview page successfully	Pass	Screenshots/TC015_Valid_Checkout.PNG
TC020	Checkout	Verify order summary values on Overview page	On Checkout Overview, review Payment Info, Shipping Info, and Price Total	N/A	Item total + Tax = Total; values match cart contents (\$29.99 + \$2.40 = \$32.39)	Totals calculated correctly: Item total \$29.99, Tax \$2.40, Total \$32.39	Pass	Screenshots/TC020_Order_Overview.PNG

TC021	Checkout	Complete order and verify confirmation page	On Checkout Overview, click "Finish"	N/A	"Thank you for your order!" confirmation page displayed with Back Home / Generate PDF order options	Confirmation page displayed correctly with both action buttons present	Pass	Screenshots/TC021_Order_Complete.png

API - dummyjson.com

TC ID	Module	Title	Steps	Test Data	Expected Result	Actual Result	Status	Evidence
API001-P1	API - Categories	Get list of product categories	GET https://dummyjson.com/products/categories	N/A	200 OK; JSON array of category objects (slug, name, url)	200 OK returned with correct category array	Pass	Screenshots/API001_Categories.PNG
API001-P1	API - Products	Get all products	GET https://dummyjson.com/products	N/A	200 OK; JSON object with a "products" array containing product records	200 OK returned with full products array (id, title, description, category, price, etc.)	Pass	Screenshots/API001_Get_All_Products.PNG
API001-P2	API - Products	Get single product by valid ID	GET https://dummyjson.com/products/1	id = 1	200 OK; product object with id=1 and full product detail fields	200 OK returned with matching product (id 1, "Essence Mascara Lash Princess") and complete field set	Pass	Screenshots/API001_Get_one_Products.PNG
API-AUTO-01	API - Automation	Automated Postman test script validation for GET /products	Attach a Postman test script asserting status code, response time, JSON content-type, and array presence; run request	GET https://dummyjson.com/products	All 4 assertions pass: status 200, response time < 2000ms, response is JSON, "products" is an array	Test Results panel shows 4/4 passed	Pass	Screenshots/test_script.PNG

X NEGATIVE TEST CASES (12)

Web - Login (saucedemo.com)

TC ID	Title	Steps	Test Data	Expected Result	Actual Result	Status	Evidence
TC002	Invalid login — username/password do not match any user	Enter an invalid/unrecognized username and a password, click Login	username: <code>erroruser</code> , password: (filled)	Error: "Epic sadface: Username and password do not match any user in this service"	Matched — correct error shown	Pass	Screenshots/TC002_Invalid_Login.PNG
TC003	Login with empty username	Leave Username blank, fill Password, click Login	blank / (filled)	Error: "Epic sadface: Username is required"	Matched — correct error shown	Pass	Screenshots/TC003_Empty_Username.PNG
TC004	Login with empty password	Fill Username (<code>error_user</code>), leave Password blank, click Login	<code>error_user</code> / blank	Error: "Epic sadface: Password is required"	Matched — correct error shown	Pass	Screenshots/TC004_Empty_Password.PNG
TC005	Login with both username and password empty	Leave both fields blank, click Login	blank / blank	Error: "Epic sadface: Username is required" (first validation fires)	Matched — correct error shown	Pass	Screenshots/TC005_Empty_Login.PNG

Web - Checkout (saucedemo.com)

TC ID	Title	Steps	Test Data	Expected Result	Actual Result	Status	Evidence
TC016	Checkout with empty First Name	Leave First Name blank, leave Last Name blank, fill Zip, click Continue	blank / blank / 65200	Error: "Error: First Name is required"	Matched — correct error shown	Pass	Screenshots/TC016_Empty_First_Name.png
TC017	Checkout with empty Last Name	Fill First Name, leave Last Name blank, fill Zip,	Sejal / blank / 65200	Error: "Error: Last Name is required"	Matched — correct error shown	Pass	Screenshots/TC017_Empty_Last_Name.PNG

		click Continue					
TC018	Checkout with empty Postal Code	Fill First Name, leave Last Name blank, leave Zip blank, click Continue	Sejal / blank / blank	Error: "Error: Postal Code is required"	Matched — correct error shown	Pass	Screenshots/TC018_Empty_postal_code.PNG
TC019	Checkout with all fields empty	Leave First Name, Last Name, and Zip all blank, click Continue	blank / blank / blank	Error: "Error: First Name is required" (first validation fires)	Matched — correct error shown	Pass	Screenshots/TC019_Empty_Checkout.PNG

API - Negative & Boundary (dummyjson.com)

TC ID	Title	Steps	Test Data	Expected Result	Actual Result	Status	Evidence
AP1001-N1	Get product with non-existent ID	GET <code>https://dummyjson.com/products/9999</code>	id = 9999	404 with JSON message: "Product with id '9999' not found"	Matched — correct 404 JSON error	Pass	Screenshots/AP1001_negative.PNG
AP1001-N2	Request <code>/products/carts</code> (wrong URL — not a valid resource path)	GET <code>https://dummyjson.com/products/carts</code>	path segment = "carts"	404 error, since "carts" is not a valid product ID	Returned 404 "Product with id 'carts' not found" — correct, since carts is not a valid ID under <code>/products/{id}</code>	Pass	Screenshots/AP1001_cart.PNG
AP1001-N3	Request <code>/products/carts/1</code> (invalid nested path, no matching route)	GET <code>https://dummyjson.com/products/carts/1</code>	path = <code>/products/carts/1</code>	A not-found response, since this path matches no real route	Returned an HTML 404 "Page not found" page — acceptable fallback for a URL with no matching route	Pass	Screenshots/AP1001_cart1.PNG
AP1001-N4	Request <code>/products/users</code> (wrong URL — not a valid resource path)	GET <code>https://dummyjson.com/products/users</code>	path segment = "users"	404 error, since "users" is not a valid product ID	Returned 404 "Product with id 'users' not found" — correct, since users is not a valid ID under <code>/products/{id}</code>	Pass	Screenshots/AP1001_Users.PNG

Quick Count

- **Positive test cases executed with evidence: 17** (13 web + 4 API) — requirement of 10+ met
- **Negative test cases executed with evidence: 12** (8 web + 4 API) — requirement of 10+ met
- **All 29 executed test cases passed** — no confirmed bugs found in this cycle (see `BugReports/Bug_Reports.md`)
- **Total evidenced test cases: 29**, all with screenshots in `Screenshots/`

These 29 evidenced rows are the executed subset backing the task's screenshot requirement. Combined with the broader planning-stage test cases in `TestCases/Web_Test_Cases.xlsx` (50 cases) and `APICollection/API_Test_Cases.xlsx` (20 cases), total documented coverage is 70 test cases, comfortably exceeding the 40+ requirement, with 5+ boundary cases present in each spreadsheet.
