

Authentication API – Bug / Observation Report

SQA Internship | Day 6 | ReqRes Demo API

ID	Title	Module	Severity	Evidence Type	Details	Status
BUG-001	Invalid password returned 200 OK with token	Login	High	Confirmed observation	The invalid-password test returned 200 OK and a token instead of an authentication error.	Open / Verify
OBS-002	Invalid email validation should be verified	Login	Medium	Needs verification	Verify that an invalid email cannot obtain a token.	To Verify
OBS-003	Missing password validation should be verified	Login	Medium	Needs verification	Verify that omitted password is rejected with an appropriate error.	To Verify
OBS-004	Missing email validation should be verified	Login	Medium	Needs verification	Verify that omitted email is rejected with an appropriate error.	To Verify
OBS-005	Empty request body validation should be verified	Login	Medium	Needs verification	Verify that an empty JSON body is rejected safely.	To Verify
OBS-006	Weak password policy should be verified	Password	Medium	Needs verification	Verify minimum length/complexity requirements against the expected specification.	To Verify
OBS-007	SQL injection input handling should be verified	Security	High	Needs verification	Verify that injection-like input cannot bypass authentication.	To Verify
OBS-008	XSS payload handling should be verified	Security	High	Needs verification	Verify that XSS payloads are treated as data and never executed.	To Verify
OBS-009	Repeated failed login protection should be verified	Security	High	Needs verification	Verify rate limiting/account protection if required by the security specification.	To Verify
OBS-010	Protected resource without token should be verified	Authorization	High	Blocked in current flow	The current /api/login flow does not provide the protected endpoint needed for this test.	Blocked / N/A

Important QA note: Only BUG-001 is based on an actual result shown during this session. The other entries are validation/security observations to execute and confirm; they are not fabricated defects. Update them after testing.
