

Authentication API Testing – Test Cases

SQA Internship | Day 6 | Tool: Postman | API: ReqRes Demo API

ID	Module	Scenario	Type	Endpoint	Expected Result	Actual / Observation	Status
TC-001	Registration	Valid registration with valid email and password	Positive	POST /api/register	Successful registration; ID/token returned	As observed	Pass
TC-002	Registration	Registration without password	Negative	POST /api/register	Validation/authentication error	Error response returned	Pass
TC-003	Registration	Registration without email	Negative	POST /api/register	Validation error	Error response returned	Pass
TC-004	Registration	Registration with empty JSON body	Negative	POST /api/register	Validation error	Error response returned	Pass
TC-005	Registration	Registration with invalid email format	Negative	POST /api/register	Invalid email should be rejected	Behavior to verify	Fail/Observe
TC-006	Login	Login with valid credentials	Positive	POST /api/login	200 OK and token returned	200 OK and token returned	Pass
TC-007	Login	Login with invalid password	Negative	POST /api/login	401/authentication error	200 OK and token returned	Fail
TC-008	Login	Login with invalid email	Negative	POST /api/login	401/authentication error	To verify	Pending
TC-009	Login	Login without password	Negative	POST /api/login	Validation/authentication error	To verify	Pending
TC-010	Login	Login without email	Negative	POST /api/login	Validation/authentication error	To verify	Pending
TC-011	Login	Login with empty JSON body	Negative	POST /api/login	Validation/authentication error	To verify	Pending
TC-012	Password	Login with empty password	Negative	POST /api/login	Password should be rejected	To verify	Pending
TC-013	Password	Login with one-character password	Negative	POST /api/login	Password policy should reject weak value	To verify	Pending
TC-014	Password	Login with long password	Boundary	POST /api/login	Request handled according to password policy	To verify	Pending
TC-015	Password	Login with special-character password	Positive/Negative	POST /api/login	Handled according to password policy	To verify	Pending
TC-016	Security	SQL injection string in email	Negative	POST /api/login	Input rejected safely; no authentication bypass	To verify	Pending
TC-017	Security	SQL injection string in password	Negative	POST /api/login	Input rejected safely; no authentication bypass	To verify	Pending
TC-018	Security	XSS payload in email	Negative	POST /api/login	Payload treated as data; no script execution	To verify	Pending
TC-019	Validation	Email with leading/trailing spaces	Negative	POST /api/login	Handled according to validation rules	To verify	Pending
TC-020	Validation	Null email and password values	Negative	POST /api/login	Validation error	To verify	Pending
TC-021	Logout	Verify user logout/token invalidation	Positive	N/A in current /api/login flow	Session/token should be invalidated	Endpoint unavailable in current flow	Blocked/N/A
TC-022	Authorization	Access protected resource without token	Negative	Protected endpoint	401 Unauthorized	Not part of current /api/login flow	Blocked/N/A
TC-023	Headers	Send request with incorrect content type	Negative	POST /api/login	Server should reject/handle invalid content type safely	To verify	Pending
TC-024	Headers	Send request without content type	Negative	POST /api/login	Request should be handled safely	To verify	Pending

ID	Module	Scenario	Type	Endpoint	Expected Result	Actual / Observation	Status
TC-025	Validation	Send extra unexpected JSON field	Negative	POST /api/login	Extra field should be ignored/rejected safely	To verify	Pending
TC-026	Validation	Use numeric value as email	Negative	POST /api/login	Validation error	To verify	Pending
TC-027	Validation	Use boolean value as password	Negative	POST /api/login	Validation error	To verify	Pending
TC-028	Validation	Use array value as email	Negative	POST /api/login	Validation error	To verify	Pending
TC-029	Boundary	Very long email input	Boundary	POST /api/login	Input handled within defined limits	To verify	Pending
TC-030	Validation	Multiple invalid fields together	Negative	POST /api/login	Clear validation/authentication error	To verify	Pending
TC-031	Security	Repeated login attempts with invalid password	Negative	POST /api/login	No authentication bypass; rate limiting if specified	To verify	Pending
TC-032	Response	Validate login response schema	Positive	POST /api/login	Successful response contains token field	Token observed in successful response	Pass

Note: Pending cases must be executed and their Actual Result/Status updated from Postman. TC-007 is recorded from the user's observed response: 200 OK with a token for the invalid-password test. TC-021 and TC-022 are blocked/N/A in the current /api/login demo flow and should not be presented as executed tests.
