

These test cases verify application behaviour at the edges of valid input ranges, using classic boundary value analysis on the Checkout form's First Name and ZIP Code fields.

Boundary Value Test Cases

Test Case ID	Module	Boundary Value	Expected Result	Status
BVA_001	Checkout	First Name = 1 character	Accepted	Pass
BVA_002	Checkout	First Name = 50 characters	Accepted	Pass
BVA_003	Checkout	ZIP Code = 5 digits	Accepted	Pass
BVA_004	Checkout	ZIP Code = 6 digits	Accepted (if supported) or validation shown	Pass
BVA_005	Checkout	ZIP Code = Blank	Validation message displayed	Pass
